SMALL CONSOLE

Available in recycled mooring post wood, oak or Douglas Pine

price - costo **560€+** delivery

A stylish console (size on request) made in recycled tropical hardwood from mooring posts all around Europe and powder coated iron. With this product you will bring a piece of history to your house. These are the mooring posts used all around Europe, in particular the Netherlands. Each post is unique. Consequently each cut, each single piece has hits on vibe and distinctive look. The cuts, out of the orthogonal directions, emphasise the natural vibes of the wood, while the straight geometry of the leg enhances the aesthetic value of the design. The height of the leg can be customized for specific needs of the client.
